

Innovative Design & Manufacturing
For over 60 years

Model 55 | Document Signer

Dual locking system is the ultimate in control. One lock turns off the electronics when not in use. The other lock prevents access to the signature plate by unauthorized personnel.

The unique design lets you interchange the signature plates horizontally or vertically. The entire signature plate is removable when not in use.

Non-resettable counter that records the number of impressions for unit control.

Models

Model 55

Model 55X - Includes optional oversized document guide.

Signature Options

Single, double or triple signatures that can be used with solid or three-color ribbon. Just insert your check and the switch is automatically tripped to imprint your signature.

Durable

The rugged, all metal construction is designed to perform indefinitely. The signature plate is made of "Miraclon" - an indestructible polymer.
